OBJECTIVE To perform implementation, support, and training of healthcare information systems for electronic health records and the emerging health information exchange networks.

BACKGROUND An information technology professional with experience in medical informatics, project management, web publishing, applications training, user support, and systems administration, as well as entrepreneurial adventures in music.

ASSETS Excellent communicator between technical and non-technical people, superior trouble-shooting and problem solving skills, creative solutions provider, quality customer care giver, attention to detail, versatile, ability to learn quickly and stay flexible but on task, and a good sense of humor.

FLORIDA STATE UNIVERSITY COLLEGE OF MEDICINE

Academic Program Specialist in the Office of Medical Education 2004-present

- **Educational Technology Support:** Support an audience response system used for large group lectures and team-based learning activities. Support curriculum tools in learning management systems like *Blackboard* and *Sharepoint*.
- **Special Applications Support:** Helped support a specialized .NET video recording application (*Arcadia*) used for clinical training, observation, and evaluation of medical student patient encounters with Standardized Patients. Helped support and demo software used with simulation mannequins in clinical training.
- **Doctoring Course Coordinator:** Coordinated the multi-dimensional Year 1 & 2 Doctoring Course which provides the early clinical training. Developed a *Sharepoint* site to help manage complex scheduling, logistics, & evaluations for 240 medical students, about 25 full time faculty, and about 60 community faculty.
- **Assistant to Director of Medical Informatics:** Led the search for a suitable Electronic Medical Record (EMR) for the Year 3 curriculum. Wrote documentation and How To guides for numerous applications.
- **Informatics Trainer:** Provide support and training to medical students and faculty, including community clinical faculty, on electronic medical reference applications for decision support and evidence based practice using the electronic medical library and point of care devices like PDAs and mobile phones.
- **Web and Multimedia Production:** Helped with maintenance of departmental website. Produced multimedia projects including videotaping and editing of student and faculty/guest presentations as well as large-print poster preparation for faculty and student conference presentations.

FLORIDA STATE UNIVERSITY COLLEGE OF BUSINESS

Senior Computer Support Specialist in the Technology Center 1991-2003

- **Webmaster:** Managed two complete revisions of a college wide website encompassing over 2500 pages in 15 organizational units getting over 1800 visitor sessions a day. Experience with both dynamic page development as well as static development in HTML. Wrote and re-wrote content including graphic design and animation.
- **Systems Administration:** Performed web server administration (IIS) tasks - configuration, user account management, and backups.
- **Project Manager:** Managed multiple college wide special projects - hardware and operating system migrations for over 150 users, deployed the MBA student laptop requirement in a wireless network environment, setup and imaged computer labs (over 150 computers).
- **Customer Care:** Provided support of applications like Microsoft Office and email, virus detection and elimination, networking issues, and hardware problems for faculty, staff, and graduate students (over 200 users) by phone, email, and in person.
- **Training:** Conducted both private individual and classroom style training on a variety of applications, including operating systems and web development, Microsoft Office, and audio-visual projection equipment.
